

ANNEXE I :

LISTE DES LOTISSEMENTS dont les règles d'urbanisme ont été maintenues  
(article L 315-2-1 du Code de l'Urbanisme).

NEANT

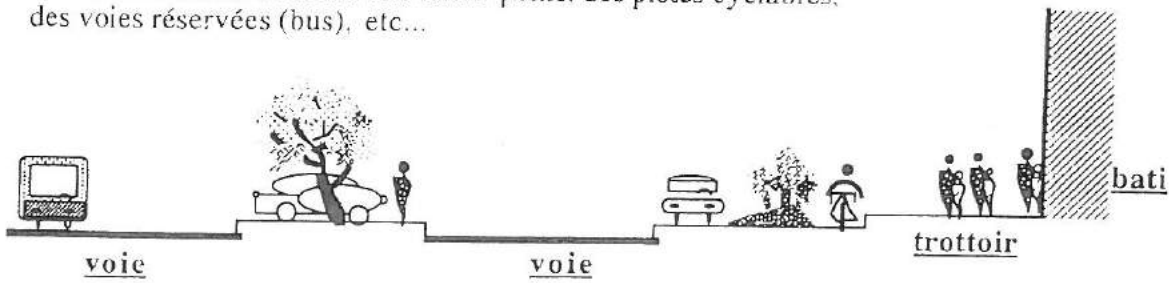

On entend par largeur de plateforme:

- la bande de roulement
- les accotements ou trottoirs

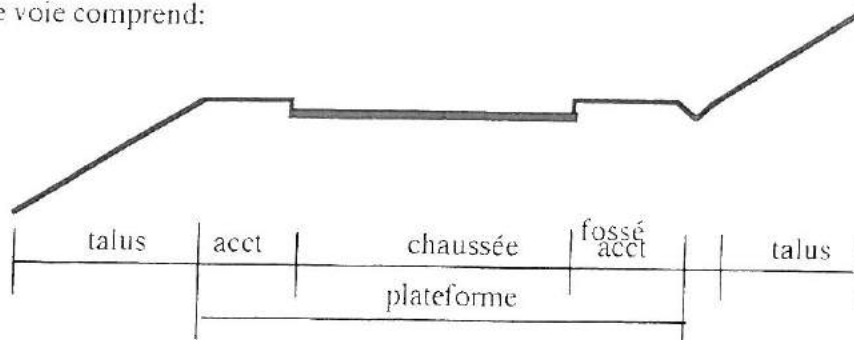

La plateforme peut comporter également:

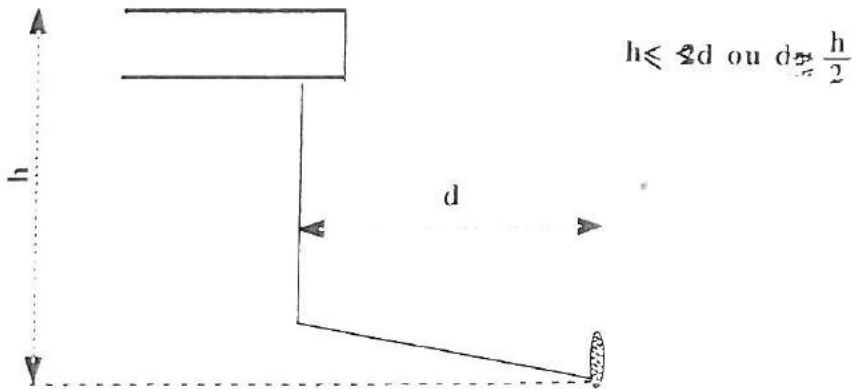

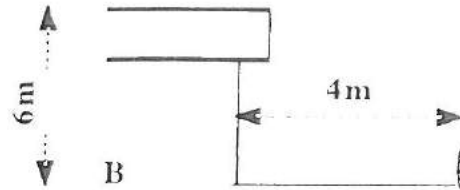

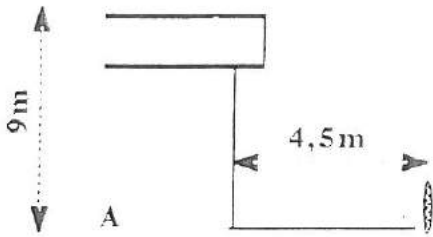

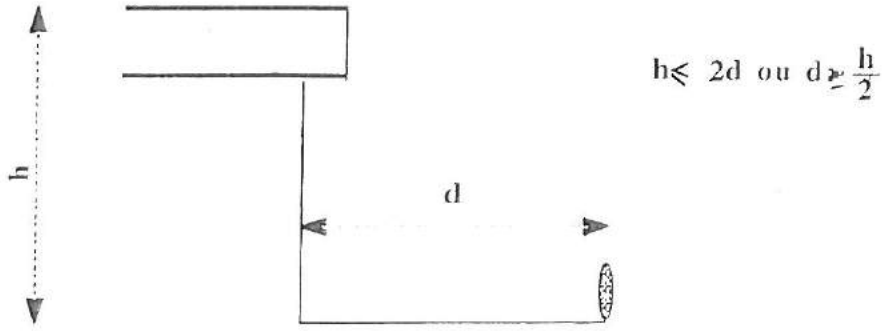

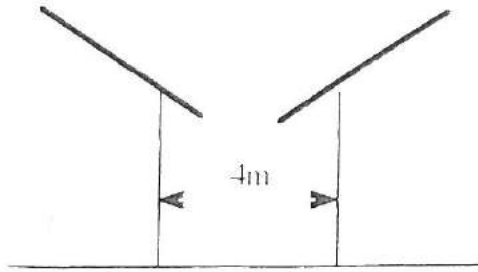

- des aires de stationnement, des terres-peins, des pistes cyclables, des voies réservées (bus), etc...

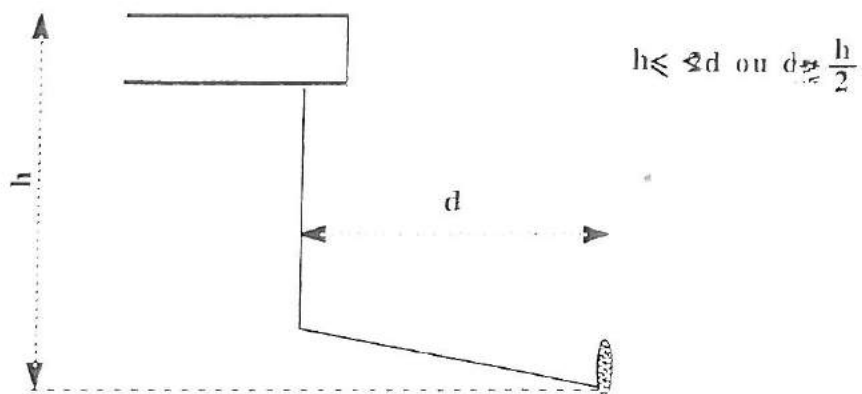

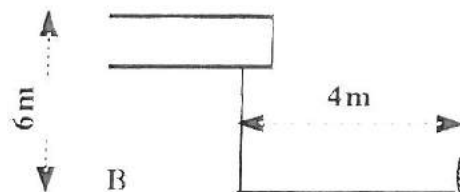

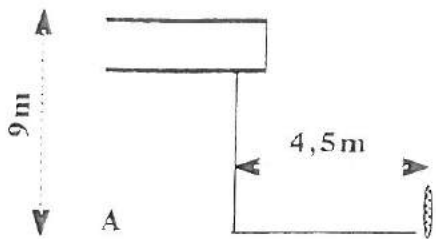

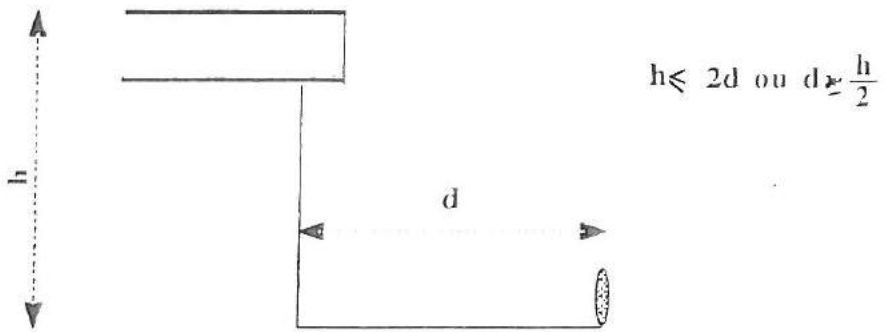

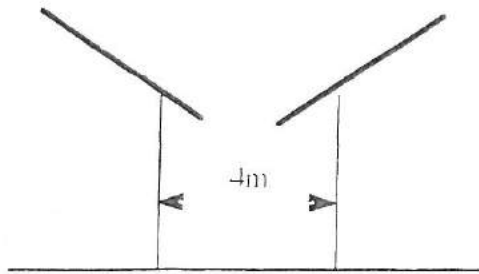

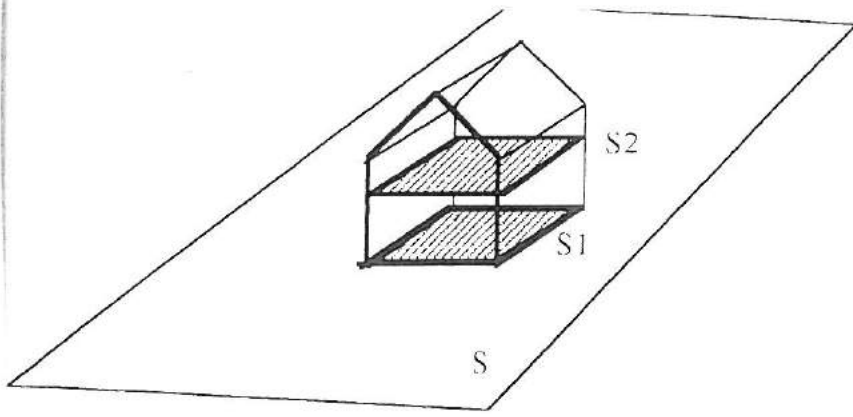

La largeur d'emprise d'une voie comprend:

- la plateforme
- les fossés
- les talus

Le coefficient d'occupation du sol (COS) est donné par le rapport:

$$\text{COS} = \frac{S1 + S2}{S}$$

S = Surface du terrain

S1 + S2 représente la surface de plancher hors-oeuvre nette de la construction.
